

# Symantec Mail Security for Microsoft® Exchange 7.9

Superior protection with unparalleled performance for Microsoft Exchange Server environments

## Overview

Symantec Mail Security for Microsoft Exchange (SMSMSE) combines Symantec anti-malware technology with advanced heuristics and file reputation to provide real-time protection for email against viruses, spyware, phishing, and other malicious attacks. For additional protection, SMSMSE offers Symantec Premium AntiSpam<sup>1</sup>, powered by Brightmail™ technology. Together, these protections help to stop 99 percent of incoming spam with less than one false positive per million. SMSMSE enforces content filtering policies on Microsoft Exchange Server 2010, 2013, and 2016, while supporting hosted, Microsoft Hyper-V®, and VMware® virtualized Exchange server environments. Symantec Mail Security for Microsoft Exchange complements other layers of protection by preventing the spread of email-borne threats and enforcing data loss prevention (DLP) policies.

## New Features

- **Layered Defense** – SMSME helps to keep mailboxes infection free at all times by continuously scanning for new attacks that may have been missed by first-layer defenses such as email gateways.
- **Email Remediation** – Innovative and powerful malware remediation helps to remove missed day zero threats and unwanted email from all Inboxes and Sent folders.
- **Consolidated Security Report** – Enables customers to view and analyze the security posture of their Microsoft Exchange environment in detail.
- **Quarantine Search** – Server and group level quarantine search improves and accelerates the ability to search and analyze quarantine data.
- **Transport Scan Optimization** – Accelerates scanning performance at transport to benefit enterprises processing large volumes of email.
- **Technology Enhancements:**
  - Native 64-bit support
  - File Reputation
  - Support for Micro Definitions enables quick updates

## Key Benefits

### Strong Protection for Email

- Ability to scan messages in transit or resident in the mailbox provides full time protection against email borne threats.
- SMSME protections combined with Symantec Premium AntiSpam help to stop 99 percent of spam emails with less than one false positive per million.
- Rapid release of definitions and advanced heuristic technologies provide immediate protection.
- Powerful email remediation feature that can also be leveraged by other messaging security products.
- Advanced content filtering protects sensitive information using pre-defined policies, regular expressions, attachment criteria, true file typing, and more. Microsoft Active Directory® based enforcement simplifies policy management.

### Flexible, Easy-to-Use Management

- Initial setup can be completed within 10 minutes. No need for tuning, allow listing, or block listing.
- Management console offers remote installation, centralized server group policy configuration, notifications, alerts, and scheduled consolidated reporting.
- Integration with Microsoft Systems Center Operations Manager enables end-to-end monitoring of IT environments.

## Optimized for Microsoft Exchange

- Flexible, real-time, scheduled, and manual scanning provides efficient protection.
- In-memory scanning and effective multi-threading improves performance.
- Consolidated security reporting enables customers to view and analyze the security posture of their Microsoft Exchange environment in detail.
- Edge and hub-focused scanning leverages anti-virus stamping to eliminate redundant scanning and minimize impact to email store.
- Supports Microsoft Exchange 2010, 2013, 2016, Microsoft Hosted Exchange, 64-bit Windows, VMware®, and Microsoft Hyper-V® Virtualized environments.

## System Requirements

### Server Operating Systems

- Microsoft Windows Server® 2008, 2012, 2016
- All Microsoft Exchange Server® supported flavors of Windows Server

### Exchange Platforms

- Microsoft Exchange Server® 2013, 2016 (Mailbox, Edge Role, 64-bit)
- Microsoft Exchange Server® 2010 (Mailbox, Transport, Edge Role, 64-bit)

### Management Console Operating Systems

- Microsoft Windows® 7, 8, 10
- Microsoft Windows Server 2016 Standard/Datacenter
- Microsoft Windows Server 2012
- Microsoft Windows Server 2008 R2/SP2 Standard/Enterprise
- Mail Security Console supports 64-bit processors on all supported operating systems

### Hardware Virtualization

- VMware® vSphere ESX and ESXi
- Microsoft Hyper-V® 2008, 2012, 2016
- Windows Server 2008, 2012, 2016 with Hyper-V technology
